

Reminders - Demeng & Shreya - ICS3U7 Final Project
Project Functionalities

- Add reminders to your personal to-do list.
- Reminders include:
 - Task name
 - Task description (optional)
 - Due date (date and time)
 - Priority (low priority, normal priority, high priority, very high priority)
 - Labels
- Reminder labels, which are essentially groups of tasks
 - ex. "School"
 - Customize the label name and colour
 - Optionally choose for the label to be displayed separately in the GUI so you can only view tasks that have the specific label
- Edit existing reminders and labels
 - Reminder editors will have a label selector where users can select an unlimited amount of labels they want to use, and also modify/add/delete labels in the same GUI
- Mark reminders as "completed" and have it removed from GUI
- Delete labels
- Sort reminders by 2 methods: due date or priority
- Load and save reminders/label data from text files so you keep your data after closing the application
- "Calendar view" for reminders, where reminders are put into their respective due dates on a calendar
 - Paginated months and years
 - Click on a day to view all reminders from that day, mark the reminders as done, edit them, or create a new reminder
- Unlimited reminders- menus are scrollable
